## POOL EXERCISE CLASS DESCRIPTIONS 2025

### **The Original Waterpower Workout-Shallow Water**

**Not Scheduled at this time**

**This class is a challenging high-intensity workout. Experience with water aerobics is helpful but not necessary.**

**Not appropriate for those with acute medical conditions.**

Begin with running and bouncing across the shallow end of the pool followed by jumping exercises that can be performed by most fitness levels. Flotation belts are used only if there's a weight-bearing injury to be protected. Next comes 30 minutes of aerobic and anaerobic work, then students perform upper and lower body strengthening exercises. Finish with stretching.

### **Deep Waterpower Workout**

**Mon-Fri, 12:20-1:20pm, Sat, 2-3pm**

**This class is a challenging high-intensity workout. Experience with water aerobics is helpful but not necessary.**

**Not appropriate for those with acute medical conditions.**

Put on a flotation belt and run, Powerwalk, and Speedwalk in the deep end for interval training. Stretch, kick training, agility exercises, all with no weight-bearing. Finish with upper/lower body strengthening exercises.

### **Gentle Water Exercise Class-Deep Water**

**Mon-Fri, 5:30-6:30pm, Sat, 3:15-4:15pm**

**This class is an easier level of exercise. Appropriate for those recovering from surgery or starting the first exercise program in years. Gentle and self-paced.**

Increase cardiovascular endurance. Complete exercises at your own pace at an easy-to-moderate intensity. May do deep water exercises at the wall or tethered depending on level of ability. Most exercises completed at the wall or "braced" rather than free floating. Increase strength by using the water as resistance. Pool resistance equipment is available for those who wish to use it. Overall, slower pace, lighter intensity.
